SIDE ENTRY WATER CONTROL PROJECT

Work has been completed, on schedule , for our ice and water control project .

The purpose of this project is to prevent water from entering the garage area.

NEW ENTRY SYSTEM

We are putting the final touches on our new digital Entry system. Enhancements will include a television view of who is at the front door, (details to follow), tracking history, and a keyless fob swipe option. No more fumbling for your keys to open the door!

Key fobs can be purchased at the office for \$20 each. The fob will be individually coded out to you for security purposes. If lost, it can be deactivated.

We have added three new high intensity lights around the garage for added visibility in the evening.
